

Maritime to rise above the curve

Optimizing fleet management

As the maritime industry faces changes and challenges, fleet management is more important than ever. SERTICA is a flexible and user-friendly solution that optimizes your business within maintenance, procurement, HSQE and performance.

It provides a flexible modular system combined with reliable communication and data management. This simplifies operations, optimizes performance and saves costs. The software is complemented with on-going consultancy from experts who know and understand your business.

- **Streamline workflows**
- **Obtain an overview of the entire fleet**
- **Display important data in dashboards**
- **Measure and optimize performance**
- **Facilitate growth**
- **Reduce CO₂ emission**
- **Reduce Total Cost of Ownership (TCO)**
- **Achieve reliable data exchange**

A large cargo ship is seen from a distance, sailing on a calm sea. The sky is filled with dramatic, layered clouds, with some light breaking through near the horizon. The ship is dark against the lighter water and sky.

“SERTICA gives us a great deal of flexibility, and it is very easy to use across the organization. We trust the system to automatically synchronize between vessel and office, and our people can easily track changes and follow up.”

BERGE BULK

Designed to move your business to the next level

Often fleet managers rely on multiple incompatible solutions to optimize performance. With SERTICA, you can easily plan, execute and monitor the entire process in one single system. Display important KPIs in dashboards to get an overview of what needs your immediate attention.

The wide range of compatible modules can be combined to match your company's specific needs and priorities. Gain a competitive edge through digitalization with an agile partner encouraging your involvement in product development.

- A simple and user-friendly system
- A strong interface engine to various systems
- Flawless synchronization of data
- Reliable communication
- Transparent data

Maintenance

Manage, monitor and document maintenance activities in all lines of business.

Module examples:

- Certificate
- Dry Dock
- Forms

Performance

Identify all factors affecting the fuel consumption of your vessels and operating expenses to optimize efficiency and reduce TCO.

Module examples:

- Vessel Reporting System
- Diesel Management
- Analytics

SERTICA offers a wide range of functions and features for maritime businesses.

Procurement

Optimize procurement processes and experience a paperless and streamlined workflow.

Module examples:

- Invoice Management
- Logistics & Shipment
- Inventory Control

HSQE

Create the best conditions for your facilities and crew while ensuring complete traceability and accurate reporting.

Module examples:

- Inspections & Audits
- Management System
- Event Reporting

“The system checks the invoices, and we are less dependent on specific people to approve them. **SERTICA works very well for us, and we have reduced our internal paperwork, administrative expenses and resources.**”

ULTRASHIP

Turn your mobile device
into a powerful tool
to speed up internal
processes and workflows.

SERTICA is completed by a variety of high-performance apps so that you can use SERTICA from anywhere in the world. You have access to carefully selected areas of SERTICA no matter if you have internet connection or not – you only need your smartphone or tablet.

Approve purchase orders, create maintenance jobs, postpone events and jobs, optimize stock management, approve and create forms, evaluate inspections and invoices from your mobile devices on the go.

Logimatic also offers to host, run and maintain your SERTICA solution in the cloud. This saves you time on local IT administration, installation, configuration and backup.

Cross- functional modules

SERTICA offers a variety of modules creating synergy across your maintenance, procurement and HSQE departments.

Analytics

A unique reporting tool that allows you to create your own templates and flows to extract and analyze any relevant combination of data from SERTICA.

Dynamic Dashboard

Empowers administrators to design custom dashboards and distribute them to the fleet. Display KPI and Analytics reports in a graphical format.

SYNC

Synchronizes data between SERTICA and other systems such as your ERP system with minimum effort.

Data Synchronisation

Passes and synchronizes data between the vessel and the office in the form of transactions.

Master Data Management

Optimize maintenance and procurement processes with data in one location. Master Data Management allows you to administrate data on jobs, spare parts, documentation and components.

Task List

Task List gives a complete overview of all flows, responsibilities and tasks of an entire fleet.

Document Management

Stores, updates and distributes documents between office and vessels.

Fleet Supervision

Maintains an accurate copy of all vessel databases. This allows you to instantaneously access each individual vessel database as well as assessing data across all vessels.

“We have not chosen a system supplier but a partner that can support us and our ideas for the future. Logimatic is an agile development partner with an innovative mindset similar to our own.”

EURONAV

Based on experience and **industry knowledge** we offer reliable and flexible software services that keep moving the maritime business of all kinds of vessels.

**“The SERTICA
dashboards offer
a great overview
of our fleet. This
improves operations
and efficiency, and
the transparency
motivates our
employees.”**

J.LAURITZEN

More than just software

**We believe in collaboration and partnership,
and we know that the right support makes all
the difference in the world.**

That is why we make it our business to go beyond what is expected. Our consultants are with you every step of the way and will help you implement your solution to ensure a smooth process.

If you have any problems or inquiries, help is never more than a phone call away. Issues are handled immediately by software experts who know the solution and who can offer the very best guidance. We also offer consulting, training courses, and daily customer support from the people who have developed the system.

Logimatic is an agile and trustworthy partner, who both listen to your needs and challenge you on optimizing fleet management.

In close partnership - based on experience and knowledge - we offer reliable and flexible software services that keep moving your maritime business.

SERTICA is a software solution by Logimatic for maintenance, performance, procurement and HSQE in the maritime business. Developed in close collaboration with customers SERTICA meets the needs of managers and everyday users. This makes SERTICA a very user-friendly system.

Together with Logimatic's 30 years of global experience and competent consultancy, SERTICA is more than a software system. Shipping is in our DNA and we offer a solid technological platform with a proven track record.

We build our partnerships on trust, knowledge and co-operation to keep moving our customer's maritime business. From our offices in Denmark and Singapore, we offer support to customers around the world.
