

# Time for optimization

# Save time and money with SERTICA Maintenance

Release resources in the technical department and extend the lifetime of your equipment with SERTICA - a flexible software system that manages, monitors and documents maintenance tasks in all types of companies.

SERTICA is aimed at the often hectic life of a maintenance department and provides a quick overview of vital information. With scheduled and condition-based maintenance, you can follow and optimize maintenance jobs, equipment, components, inventory and the purchase of spare parts. The software is supplemented with ongoing advice from consultants who know and understand the tasks and challenges in a maintenance department.

- **Reduced breakdowns and downtime**
- **Manage inventory and usage**
- **Maintain knowledge of equipment and machinery**
- **Create better working conditions**

**“Planned maintenance has reduced downtime in the production by 50% and improved the production rate significantly. In addition, SERTICA gives us a better working environment with fewer unexpected tasks.”**

## Key modules in SERTICA Maintenance

### Document Management

Efficient solution to electronically store, update and distribute documents across the organization.

**What you get:**

- Document content search
- Online access to documents
- Access to the newest version of documents

### Job App

Handle maintenance jobs through mobile devices and reduce the time needed in front of a computer.

**What you get:**

- Complete and always updated job list
- Mobility, efficiency and availability
- Faster reaction to maintenance

### Forms

Simplification of the processes with predefined templates for reporting, checklists and working permits.

**What you get:**

- Easy reporting of required documentation
- Templates in MS Word and Excel
- Automatic import of data

### Defect Reporting

Streamline workflows with the registration of defect reports and service requests electronically to the maintenance department.

**What you get:**

- Fewer mistakes and delays
- Easy and direct defect reporting
- Follow-up on defects in the system

### Journal

Keep track of everything that affects your work-day and the production during a work shift.

**What you get:**

- Overview of all events
- Full integration with maintenance
- Knowledge sharing between employees

### Week Report

Full overview of registered hours, acquired vacations, overtime, participation in seminars and time off for a single employee - all in SERTICA.

**What you get:**

- Detailed overview of employee registration
- Flexible setup customized to the user
- Built-in approval workflow

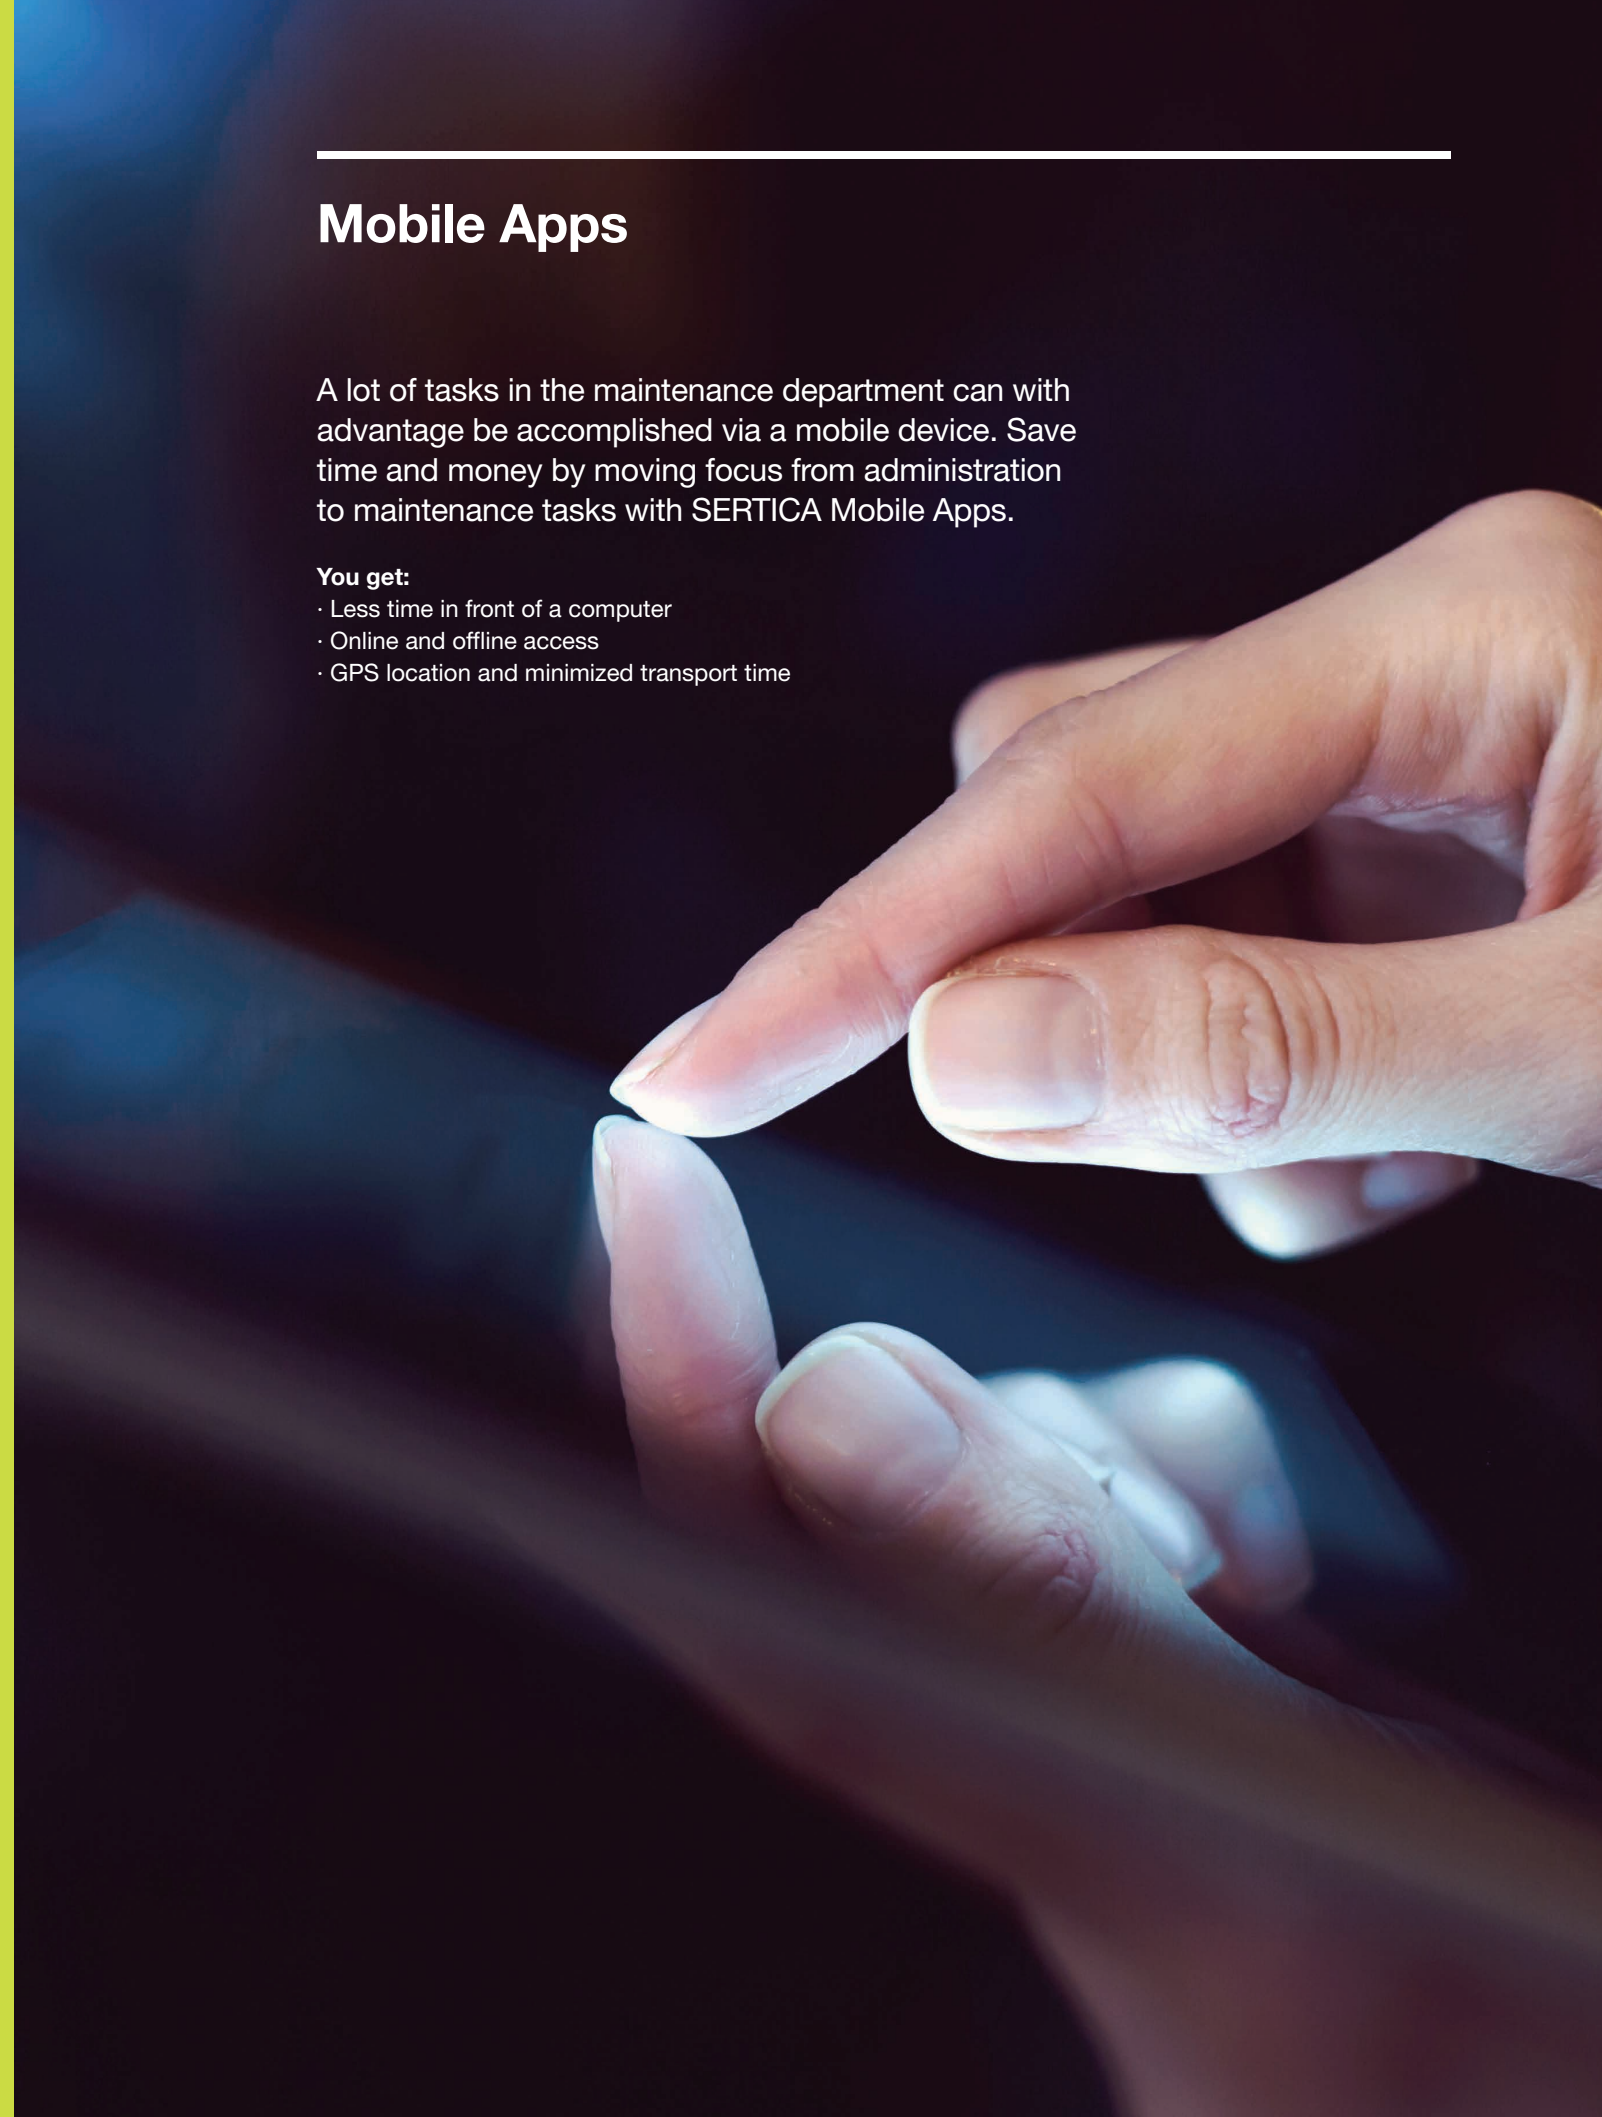

---

## Mobile Apps

A lot of tasks in the maintenance department can with advantage be accomplished via a mobile device. Save time and money by moving focus from administration to maintenance tasks with SERTICA Mobile Apps.

**You get:**

- Less time in front of a computer
- Online and offline access
- GPS location and minimized transport time

**“We no longer send error reports via our internal mail system. With a few clicks the guy on watch can report errors electronically to the maintenance department 24/7. SERTICA gives us an easier, direct and more efficient workflow.”**

BIOFOS

## Synchronization provides value

### SYNC

SERTICA SYNC synchronizes data between SERTICA and the company's ERP-systems without integration problems.

#### You get:

- Increased automation
- Strengthened financial control
- One shared data source, including suppliers, inventory, registration of hours and other master data

### OPC

Via the integrated OPC client you can automate reading of count values and alarms.

#### You get:

- Automatic import of counter values
- Optimization of planned tasks
- Activation of condition-based tasks

**SERTICA can be connected to other systems with different interfaces and thus become a central system in your company.**

# Maintenance at all levels

A maintenance system is not only important for the daily user but also for anyone who needs to manage and measure performance in the maintenance department.

### Analytics

Analytics is a unique tool that can extract and analyze any relevant combination of data. Data is exported from SERTICA to Microsoft Excel, where it is possible to draw graphs and pivot tables. With a few clicks you can get customized reports as "The 10 most expensive maintenance jobs" delivered directly to your email inbox.

#### You get:

- Subscription to customized reports
- Effective data analysis
- Quick identification of operational savings

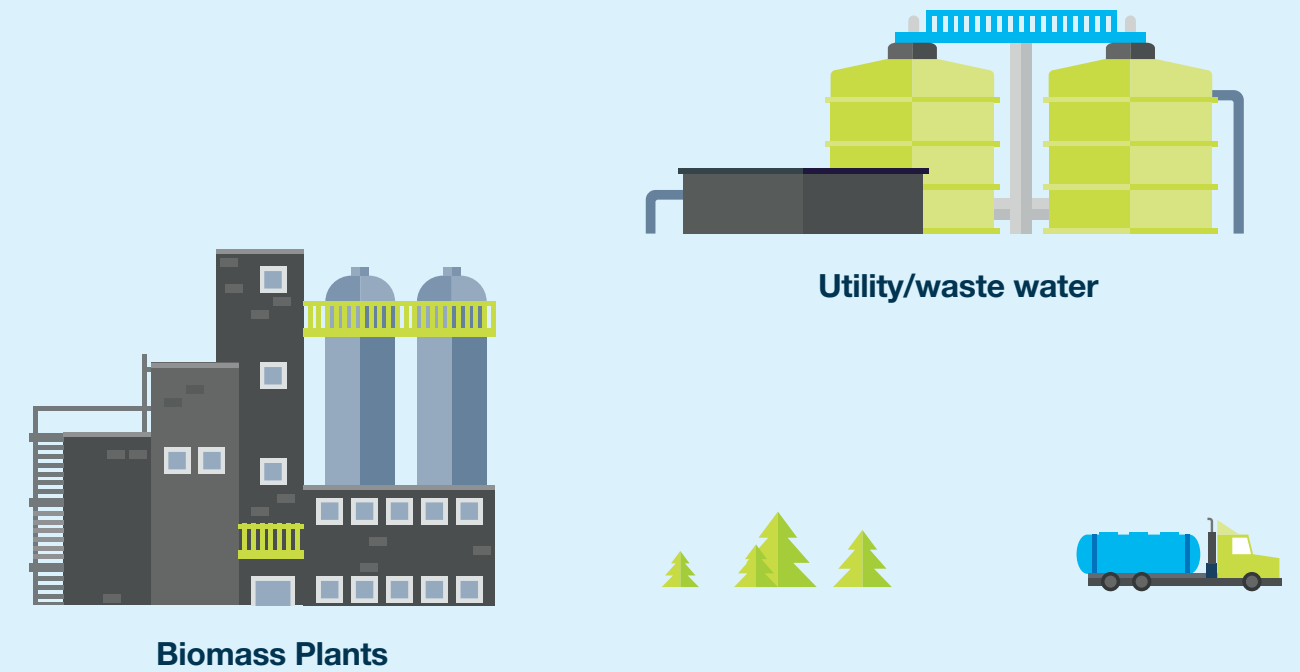

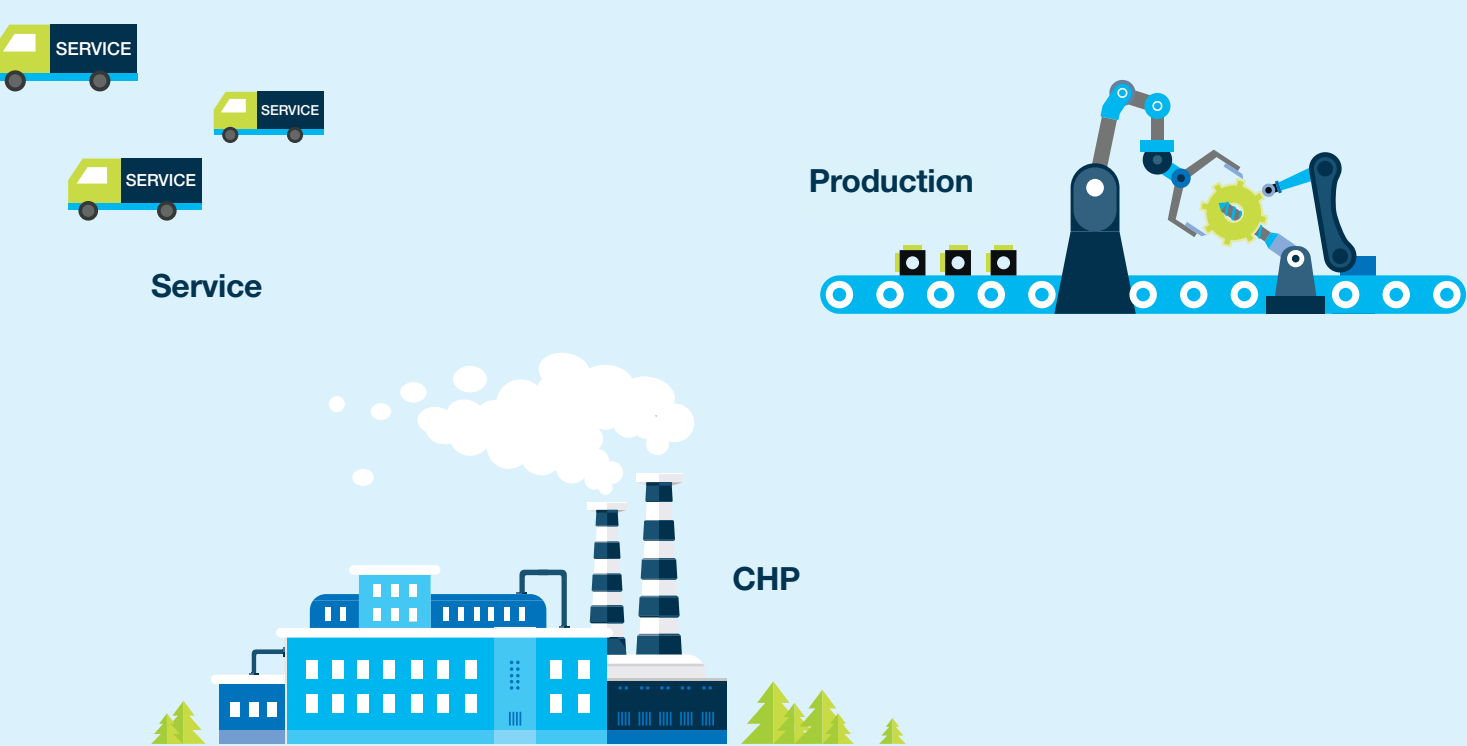

### Dynamic Dashboard

Design your own dashboards and achieve a better overview of your data in SERTICA. For example, your dashboards may contain information about job statistics, Excel graphs, and KPI highlights. You decide layout and colors and may include, for example, KPI thermometers, -traffic lights and speedometers.

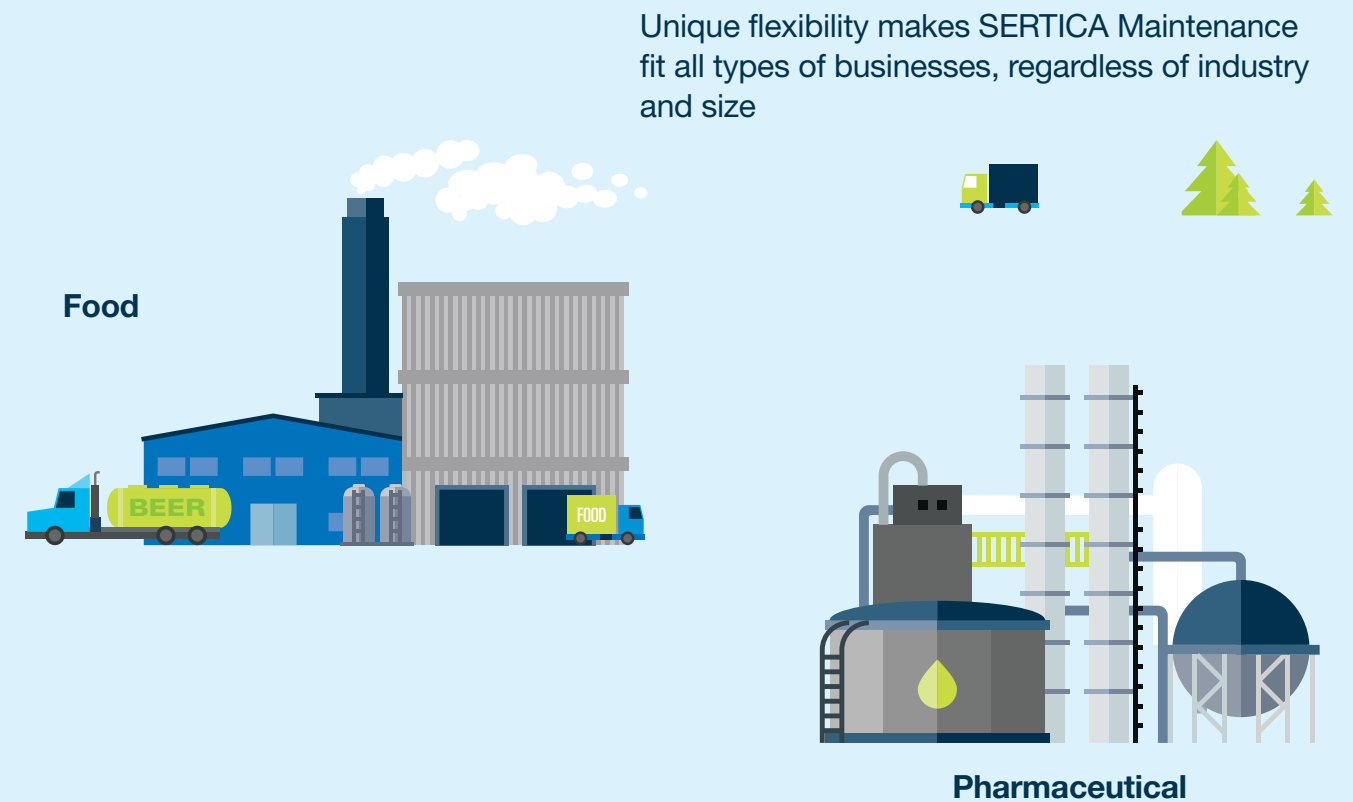

#### You get:

- Updated overview of your data
- Management tool for follow-up
- Modern and structured layout of information

Optimization and efficiency for

all types of companies

# More than just software

SERTICA is more than just a software system. We believe in collaboration and partnership, and we know that the right service and support makes all the difference in the world.

That is why we make it our business to go beyond what is expected. Our consultants are with you every step of the way and will help you implement your solution to ensure a smooth process.

If you have any problems or inquiries, help is never more than a phone call away. We offer consulting, training courses, and, of course, daily customer support. Support issues are handled immediately by software experts who know the solution and who can offer the very best guidance.

---

**SERTICA Maintenance includes document management, maintenance jobs, inventory, spare parts components, history and much more. It is developed in close cooperation with industrial and maritime customers worldwide and reflects both the needs of managers and everyday users.**

Logimatic is the software company behind SERTICA. We have more than 30 years of global experience in development, sales, implementation and support of in-house developed software. Our wide experience is built through numerous implementations of software solutions worldwide. It has given us a unique knowledge and makes us more than just a system supplier.
