Logimatic Engineering
- your automation partner

Maximize your production efficiency with Logimatic

With more than 30 years of experience as a provider of automation solutions, Logimatic is a serious and safe choice as an automation partner. Logimatic has a special focus on the industries: Utility, energy and marine. We work to ensure you optimal control with the best suitable solutions.

A great partnership
Our highly skilled staff has a unique knowledge within automation solutions, IT/OT-network and project management. In disciplines such as PLC, HMI, SCADA and technical network, our specialists are always up to date on the latest technology and the latest requirements within your industry. We ensure education on an ongoing basis, so we are always at the forefront of technological development.
In the integration of systems and communication to third-party systems and to administrative systems, our experience base is also large. Through dialogue we identify your needs, and develop the best solution for you and your business.

Optimized operation improves resources
We work to provide the best solutions to our customers. It means that we advise and step in where it provides most value to your business. Through dialogue and professional sparring, we develop and optimize your system. By this, you're insured the best control, regulation and monitoring of the system og facilities

System integrator in automation
We provide total solutions within automation, from project management to instrumentation and networks. Our experts are well equipped to shape a solution that ensures optimal communication between HMI, SCADA and PLC, and that meet your exeptations and needs.
Basically: You'll get a flexible solution that works.

Network, HMI and SCADA
Speed, stability and secutiry are essential parameters in every SCADA system. We build you a first-class infrastructure, with the option of remote access via PC, mobile and tablet, without compromising on stability or IT / OT security.

Introduction & training
We value a good handover of a new or updated solution and system. You are offered a specialized training of the users and an ongoing training and support after start-up. We mean, that makes the best value for you. Logimatic has facilities for education, but the training can also take place at your base. If you have any preferences for form and content, we are happy to adapt so you get the most out of the education sessions.

"Through good dialogues, we find the right and value making solution for your team"
Martin Bro,
Head of Projects

Our design complies with the ISA101-standard

Our services
As system integrator in automation, we are a top supplier with services in all phases of an automation project. Our solutions are build flexible, so we can make the best solution for you.

We offer:
+ **Project management and controling**
+ **Design, specification og documentation**
+ **SCADA, HMI & PLC programming**
+ **Boards & instrumentation**

Technology
The best solution is made based on a deep experience with the technology. With our technological expertise, you are ensured systems from the leading suppliers as well as equipment that is at the forefront of technology.

We offer:
+ **IOT-solutions, network og databases**
+ **Advanced PLC-solutions from ex.: Siemens, Rockwell and Schneider**
+ **SCADA: IGSS, WinCC, Factory Talk**
+ **IT-security & OT-security**

Service & Support
Support is given by our experts with the latest knowledge and deep technical experience. Time consumption, scope and depth of service and support vary. That is why we offer different options for service and support. Let us know your choice!

Service agreements:
+ **Support & updates**
+ **24/7 Hotline support**
+ **Network monitoring**
+ **Read more at logimatic.dk/automation**

AUTOMATION
BY LOGIMATIC

A solution from Logimatic.

Logimatic is a Danish engineering and software company, founded in 1987. We are specialists industrial automation, HMI, SCADA, supply chain and a number of niche areas — all with the overall aim of increasing efficiency and strengthening our customers' competitiveness.

We deliver customer specific solutions that support the individual customer's business processes. Our goal is to offer solutions and concepts that are at the forefront of the technological development, where high quality meets customer satisfaction.

When we identify needs and challenges at our customers, we see it as our most important task to develop new solutions that create value.

We prioritize working closely with our customers. You know your business best. We have the software and expertise. In close cooperation, we can achieve the best solution — a solution that is well rooted in your business and that creates excellent results.
